About AcuCort AB (publ)

AcuCort has developed and commercializes ISICORT[®], a new fast-dissolving oral film to put on the tongue, based on a well-known cortisone substance – dexamethasone. ISICORT[®] is a smart product in a new, innovative, patented, and user-friendly dosage form primarily for the treatment of severe and acute allergic reactions, croup in children and chemotherapy-induced nausea and vomiting (CINV). A national application was approved by the Swedish Medical Products Agency (MPA) in October 2020. In February 2021, ISICORT[®] was granted an additional indication – the treatment of COVID-19 patients who need supplemental oxygen treatment. Altogether, this strengthens the company's assessment that the time to commercialization of ISICORT[®] may be relatively short. AcuCort (ticker: ACUC) is listed on the Spotlight Stock Market in Sweden. Please visit www.acucort.com.
